

### Controls/Instructions

Step into the role of Professor Amanda Goldberg and try to find the secret of the ancient pyramid. In every scene you can find different items, which you can examine, take, use or combine. All picked up items are in your inventory where you can examine them again. Besides, you can use items from your inventory with other objects in the scene. Just position your character in front of the object and then use the item from your inventory. You can also combine two items in your inventory by selecting them one after another. Always take in consideration that you can only move the characters to the left and to the right.
